PRICE LIST
OF
Gladiolus Bulbs

M. F. WRIGHT & DAUGHTER
401 South Clay Street
Sturgis, Michigan

• LIBRARY

AS this is a time for conservation, we have decided to get out only a cheap list this fall. We have to put in practice the old saying: "Earn all you can, save all you can and give all you can," as the boys over there are in need of help, and we must do our bit.

We also wish to inform our customers that we have never raised a finer lot of bulbs than this season.

This list will practically be a duplicate of last year's list, so far as varieties are concerned.

Prices in this list are figured on a cash basis, and do not include postage nor express charges.

If you find any variety or varieties in this list, and want planting stock or bulblets, if you will give us name, size and number wanted, we will gladly quote prices on same.

DESCRIPTIVE LIST OF NAMED VARIETIES

GLORY. (*Kunderdi.*) Pinkish cream. Large, open flower: fine markings; wavy or ruffled petals.

1	12	100	1000
\$.05	\$.75	\$ 3.00

OUR RESPONSIBILITY

We use the greatest care to pack all bulbs true to name, but do not assume any responsibility for errors except to replace any bulbs that may prove untrue.

CULTURAL NOTES

Plant any time from April (provided, of course, that ground is in suitable condition) until the middle of June in any good garden soil, from 5 to 6 inches deep. Keep well cultivated and moist. Dig in October and dry the bulbs well before putting in cellar. Be sure to cut the tops off close to the bulbs when dug or lifted in the fall. Bulbs should, of course, be kept from freezing, and, on the other hand, should not be exposed to excessive heat, which would dry them out too much, nor to too much moisture, which might induce decay or start growth.

FOR CUT FLOWERS

Cut spike when first bud opens, place in vase of water, and bloom will last several days. To keep blossoms fresh, remove all wilted ones and change water every day or two, cutting one-half inch off from stem whenever water is changed. Keeping in a cool place nights adds greatly to life of bloom.
